To whom it may concern,

I am writing this to express my strong endorsement for Mary Feaster as she pursues a further career in data science. I am instructional staff member at UNCC data visualization certification program and Mary was a student of mine for 6 months.

As a student, Mary Feaster was always engaged and participating. During her time in my class, she worked on multiple projects and managed to become a valuable asset to every group project by bringing technical skills and organizational talent to the table.

While the class covered a vast array of data analysis topics like VBA, Python, SQL, NoSQL, JS, Tableau etc., Mary managed to keep up with the high pace of the course and grasp the new concepts very quickly. That leads me to believe that she could be an excellent addition to any team out in the field.

In conclusion, I wholeheartedly recommend Mary to hire for your company without reservation. I firmly believe that she possesses the knowledge and a skill in data analysis and more important the ability to learn and implement new material very quickly.

Should you have any further questions about her, feel free to reach me at (704) 713-8943 or ygroza83@gmail.

Thanks,

Yuri Groza.
